PROJECT

SPACES OF UNIVERSITY AGGREGATION

EcoSPACE is a social area that enhances the interaction and psychological well-being of university users. The project is based on 5*5 modules composed of outdoor and greenhouse gardens that exploit a hydroponic culture, and a literary café that are completely dynamic in their spatial composition; this flexibility favors the phenomenon of adapt-Action. EcoSPACE revolutionizes the concept of space as a container, proposing itself as a dynamic content of collective well-being.
