

Europe Ambition 2030 webinar in the framework of the ASvIS Festival 2020

Multi-stakeholder Partnership and Multilateralism.

Monday September the 28th from 16:30 to 18:30 (CET).

To 'recover in the right way', to become more resilient and regenerate our planet and societies is an organizational challenge.

16:30 Opening remarks by Dasa Silovic, EPE President.

16:35 – 17:15 Session 1 Macro-economic perspective and new governance schemes.

The Green deal and Recovery Plan as noted by Commission Executive Vice-President Timmermans missions are to Reinvent society and economy, in relation with Climate change, Biodiversity, Industrial Revolution , Europe's influence in the world (standard setter)

Green deal with its European Climate Pact as well as the SDGs - all result of 'multilateral' processes - are requiring multi-stakeholders commitments towards carbon neutrality and long term objectives (2050) as well as new financial methods (a financial revolution in the digital age ?) where citizens as retail investors and tax payers are empowered

With the participation of Bruno Colmant, author of "*Hypercapitalisme : Le coup d'éclat permanent*" and Prof. Enrico Giovannini.

How systems mapping helps drive successful partnerships

The number of multi-stakeholder partnerships (including organized collaborations between governments, businesses and civil society organizations) that address the United Nations Sustainable Development Goals (SDGs) has [rapidly expanded since 2015](#). Many of these partnerships are working to transform complex systems from an unsustainable to a sustainable pathway,

Systems change evaluation and multi-stakeholder partnership experts are placing increasing emphasis on the need for partnerships to integrate systems thinking and understand the system they're working in before and during partnership implementation.

With the participation of Charlie Bloch and Madeline Tyson ,the Rocky Mountain Institute <https://www.greenbiz.com/article/how-systems-mapping-helps-drive-successful-partnerships>

Catalyse systemic innovation and be transformational

Climate-KIC is working on how to use system innovation and what are the new model of innovation to catalyse systemic innovation and be transformational. The innovation model for system innovation of Climate-KIC and talk the Deep Demonstrations as a test-bed for system innovation will be presented.

With the participation of Harald Rauter, Climate-KIC
